### PREPARED FOR THE FUTURE OF LPG

#### The new FPB R67/R110 LPG hose from Semperit

Alternatives to petrol and diesel vehicles are currently in vogue and they are pointing the way towards the future. Semperit is in lockstep with the increasing market demands and as such has developed the new FPB R67/R110 industrial hose. This innovation in vehicle hose range is one of the few hoses on the market which not only fully complies with the R67/R110 standard for LPG use, but also exceeds it in relevant properties.

#### The most important properties at a glance:

**Very good gas leak tightness/impermeability (almost 0 cm<sup>3</sup>)**

Significantly better in a premium comparison of the competition based on test results

**Low bending radius**

And the associated flexibility during use

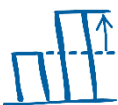

**Reliable even at low temperatures**

Temperature range from -40°C to +125°C

**A good fit for commercially available mounting clamps**

**The R67/R110 LPG standard requirements have been exceeded**

In particular, the gas impermeability and the use during low temperatures of up to -40°C

**Certified by the independent TÜV Süd Institute**

Confirmation of having exceeded the requirements of the R67/R110 LPG standard

**Order your hose sample NOW** and experience the Semperit quality in LPG applications!

**All of the product details** are available on the data sheet on our website!
